Inverness Medical is a leader in the research, development and supply of professional diagnostic products. Pathology laboratories, hospitals, specialty clinics, family medical centres and individual healthcare professionals all trust the speed, reliability and accuracy of these products, whether in the detection of infection and disease, the assessment of risk or the response to therapy.

High quality immunoassays are available for use in preventive and interventional medical strategies in the following [disease areas](#) - in cardiology, women's health, oncology, infectious disease and drugs of abuse.

The tests in these important areas of public health have demonstrated proven efficacy in hospitals and laboratories throughout the world. Trademarked [brands](#) such as Triage[®], Cholestech[®], Hemosense[®], BinaxNOW[®], Clearview[®], Determine[®], Inverness Medical TestPack[®] - and many more - have established a global reputation for accurate point-of-care testing designed to improve patient care in practices of any size.

From technologically advanced platforms to some of the industry's most extensive selections of ELISA, IFA and serology test kits, Inverness Medical offers a full line of clinical diagnostic products for any laboratory or hospital.
