Professional Products

Inverness Medical's professional diagnostic brands provide data for qualitative and quantitative patient analysis. They provide accurate diagnosis of a variety of medical conditions and disease and allow medical professionals the ability to measure a patient's response to therapy. Inverness Medical's high-quality immunoassays in pregnancy testing and fertility, respiratory, enteric and infectious diseases, autoimmune disorders, osteoporosis, cancer, and cardiology have demonstrated proven efficiency in clinics, hospitals and laboratories around the world.

Additionally, Inverness Medical continues to offer an ever-expanding range of clinical diagnostic products that includes such well known and well regarded brands as BinaxNOW®, Clearview®, Cholestech®, Determine®, INRatio®, Surestep™, Inverness Medical TestPack®, Triage® and Wampole™, among others.

These are brands with diagnostic application both at the individual and major public health levels. For example, in cardiology—a priority area for Inverness Medical—the Triage® system provides assays in several high-profile markers of cardiovascular disease. The Triage® BNP Test is an immunoassay that measures B-type natriuretic peptide (BNP), an increasingly important biomarker associated with heart failure and acute coronary syndromes.

Inverness Medical products have been created to apply the latest medical developments to create advanced assays and new technologies for the rapid detection of risk, medical condition, and response to therapy at both the individual and public health levels.
